Hazardous Weather

Hazardous Weather

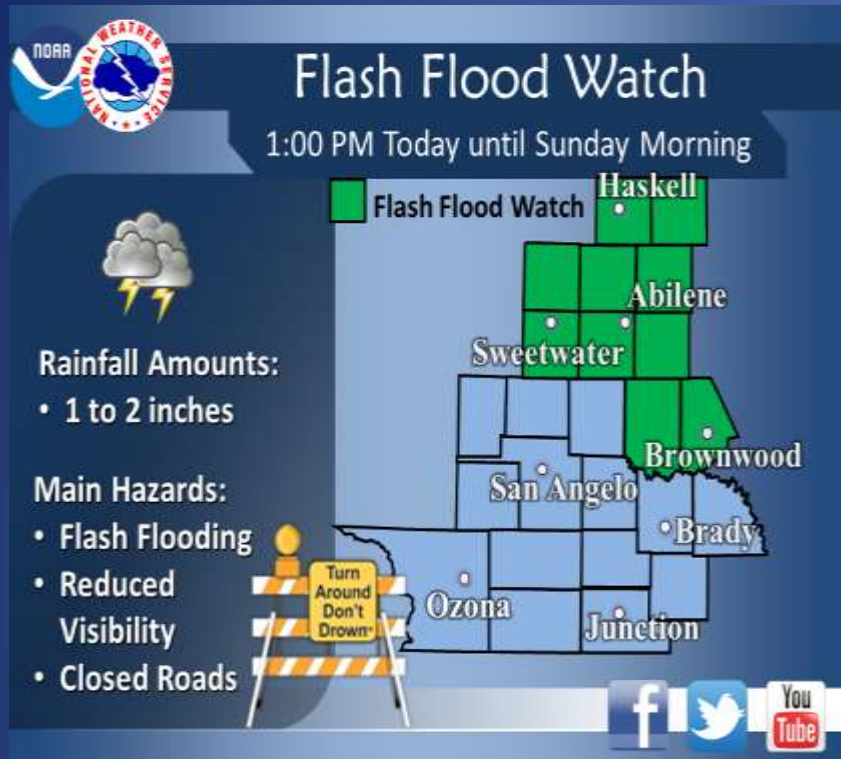

Scattered thunderstorms will develop over the higher terrain of the Gila Region and Sacramento Mountains this afternoon. Some of these storms will work their way south into the desert lowlands, especially over parts of Otero and Hudspeth County where moisture will be more plentiful

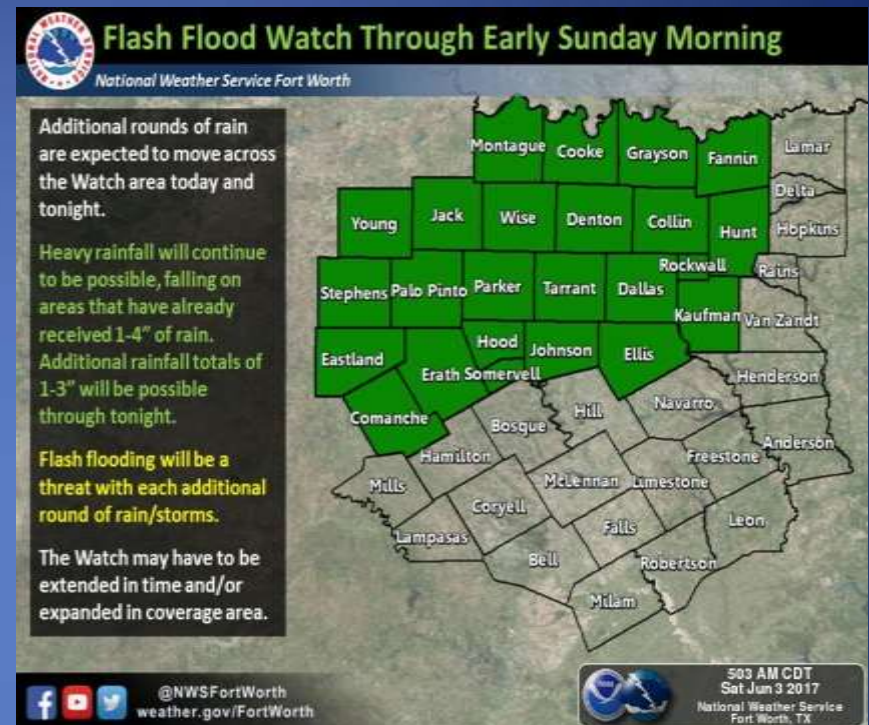

There is a chance of showers and thunderstorms areawide again today. Heavy rainfall and localized flash flooding remain the primary threat. However, a strong to severe storm capable of producing hail, strong winds over 50 mph, frequent cloud to ground lightning strikes, and even a landspout, cannot be ruled out.

Hazardous Weather

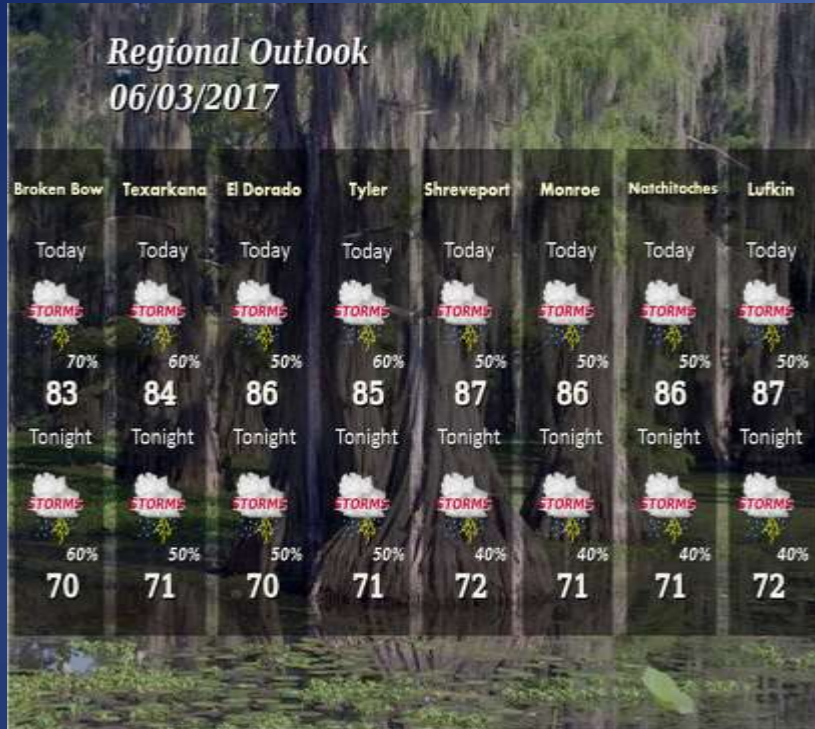

Flash flood watch in effect for this afternoon and tonight

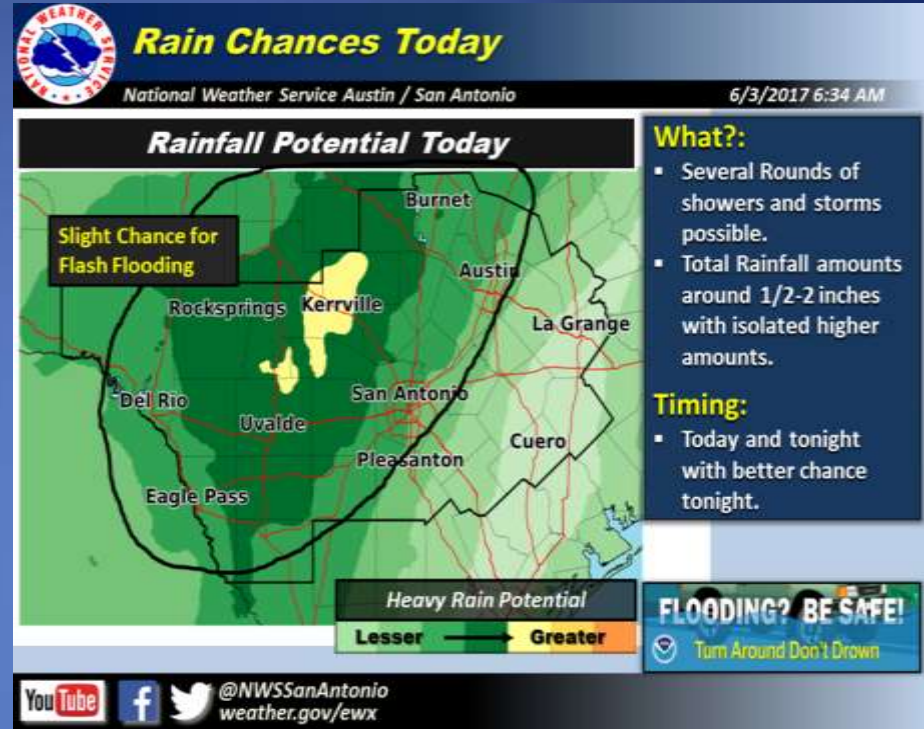

A Flash Flood Watch is in effect through early Sunday morning along and north of a line from Comanche to Kaufman to Fannin County. Some of this area has already received 1-4 inches of rain, and additional rounds of rain today and tonight may cause flash flooding issues. Rainfall totals today and tonight could be another 1-3 inches. The watch may have to be extended in time and/or expanded in areal coverage depending on trends today and tonight

Hazardous Weather

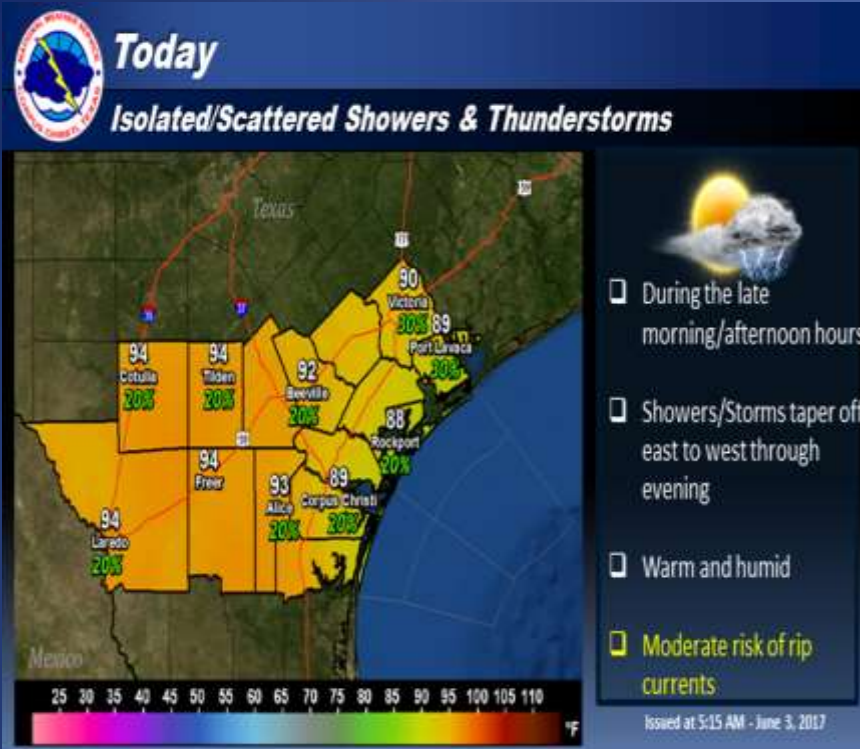

Expect increasing chances for showers and thunderstorms today as an upper level disturbance lingers across the middle Red River Valley. In addition, an inverted surface trough will be advancing northward from the Gulf today and will serve as a focus for the development of showers and thunderstorms across our southern sections. Temperatures should still manage to climb into the mid 80s for highs this afternoon although rain-cooled areas could be slightly lower

The potential for heavy rain will focus generally along and west of -35. Rain chances will increase through the day with better chances tonight. Rainfall totals will be one half to two inches leading to the possibility of flash flooding

Hazardous Weather

Another warm and humid day is in store for today. Isolated morning showers along the coast will transition to isolated showers and thunderstorms late this morning into the afternoon across the Coastal Plains and eastern Brush Country.

Some areas of low clouds and patchy fog early this morning will give way to partly to mostly cloudy skies as we warm into the 70s this afternoon. Scattered showers and thunderstorms are possible especially this afternoon and evening across the Panhandles. While storms are expected to remain below severe criteria, they will be slow moving and capable of heavy downpours. Thus, localized flooding will be possible with any storm that forms over locations with poor drainage

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
06/02/17	Urban and Small Stream Flood Advisory	Cherokee, Coke, Gregg, Harrison, Haskell, Irion, Jones, Lubbock, Lynn, Martin, Midland, Nolan, Runnels, Rusk, Smith, Shackelford, Sterling, Taylor, Throckmorton, Tom Green and Upshur Counties
06/02/17	Flash Flood Warning	Callahan, Dallas, Fisher, Jones, Nolan, Potter, Randall, Tarrant, Taylor and Throckmorton Counties
06/02/17	Flash Flood Emergency	Throckmorton County
